

**SECTION TWO:**  
**DATA CODES USED IN CDS**

## Codes Used in CDS

Section Two of *Mapping the World of Education* presents the standard variable codes used in CDS. These are contained in Parts 2, 3, 4, 6, and 7. Part 1 presents the regional groupings of country codes used to aggregate data for federal publishing purposes, and Part 5 presents the standard NSF educational program codes and their counterparts in the Classification of Instructional Programs (CIP). The contents of Section Two therefore include:

Part 1	Geographical Regions Used in U.S. Analyses and Publication of Comparative Data
Part 2	Country Codes
Part 3	Country Subdivision Codes
Part 4	Primary Language of Instruction Codes
Part 5	Standard Program Codes
Part 6	Institutional Type Codes
Part 7	Institutional Level/Program Completion Award Codes

The presentation of codes in this Section follows the order of the CDS institutional data code string. That code string, which is discussed in detail in Section One, is:

AA

### Sample Code String for Alabama A&M University Normal, Alabama, USA

**US0001010001ENAA73**

(where)

<b>US</b>	=	Country Code
<b>0001</b>	=	Institutional Identifier Number
<b>01</b>	=	Country Subdivision Code
<b>0001</b>	=	Place Code
<b>EN</b>	=	Primary Language of Instruction Code
<b>AA</b>	=	(Institutional) Type Code
<b>73</b>	=	(Institutional) Level Code

AA

Regional codes are not part of the standard CDS coding structure. Program codes are the same as those used for general SED coding purposes by NSF, and are linked to NCES CIP codes by means of crosswalks. The program codes do not form part of the CDS structure per se, but are used with CDS in order to provide data on respondents' academic histories.

Users will note that CDS place codes are not presented here. They would normally be found in code string order between the country subdivision codes and the primary language of instruction codes. Place codes are described in Chapters 3 and 4 of Section One. Reasons of space preclude the listing of all places currently assigned CDS codes and this list grows too rapidly to be conveniently and economically updated in print.

## PART 1

### Geographical Regions Used in U.S. Analyses and Publication of Comparative Data

The following assignments of countries to geographic regions are used within the United States to summarize aggregate data reported via CDS and published at the federal level. These regional breakouts may have limited or no utility elsewhere and thus are not formally part of CIDS, nor are regional coding assignments made (see Chapter 3).

Where applicable, regional and country codes used in the former SED coding systems are indicated in the column to the left of the new regional and country assignments. Gaps occur because either the former system assigned no corresponding country code or because no continuity exists between a former and a current regional assignment.

Regional titles are printed in full capital letters in boldface type. Country titles are printed in upper- and lowercase letters in regular type. Refer to Part 2 for a presentation of CIDS country codes.

## PART 2

### Country Codes

Names of countries and other entities included in this subcode listing are those most commonly in use, and are based on internationally recognized data code assignments made by the International Association of Universities (IAU). Political prefixes and suffixes (such as "Republic of," "Kingdom," etc.) are not used unless they are an integral part of a country's popular name or are necessary in order to distinguish one country from another.

Nonsovereign entities that are included in this coding system have their names followed by that of the governing power or oversight authority, in order to assist users who may wish to aggregate all territories belonging under a given sovereign state's suzerainty. Refer to Chapter 3 of Section One for a detailed discussion of the methodology employed in regard to non-sovereign entities.

Country code assignments made in the former SED coding system are indicated, where they existed, in the lefthand column.

#### Special Note on Time-Series Problems

A small number of countries sending large numbers of students to the United States have experienced political unification or division in recent years. When a country breaks up or joins or is absorbed by another, data problems are created for which special decision rules are needed. The following discussion provides guidance for dealing with the most important cases of political change.

**Pakistan.** Pakistan has existed as a sovereign state since 1948. In 1972 the former Pakistani province of East Pakistan achieved independence as Bangladesh. Pakistan continued to exist after 1972 minus one province.

**Germany.** Germany was formally divided in two in 1949 with the creation of the Federal Republic of Germany (West Germany) and the German Democratic Republic (East Germany). Neither of these states occupied the whole territory of pre-1945 Germany, and both asserted the unity of the German nation in their constitutions and refused to accept national division. In 1990 Germany was united through the absorption of East Germany by West Germany. The German Democratic Republic then disappeared and its territory was reorganized into the federal states which had existed prior to partition in 1949.

**Yugoslavia.** Yugoslavia underwent change in 1991 when the federal republics of Bosnia-Herzegovina, Croatia, Macedonia, and Slovenia declared their independence.

The remnants of Yugoslavia, however, continued to exist as the Yugoslav Federation.

**Soviet Union.** The Soviet Union completely disappeared in 1991 and its constituent republics emerged as independent states.

The data questions raised by these developments are chiefly two: what to do with individual data and with institutional data? A central principle of data recording, for SED and other surveys, has been that place locations are geographically fixed even as political conditions change. (Names of places occasionally change, as in Leningrad/St. Petersburg and Karl Marx Stadt/Chemnitz, but these are noted as alternative names referring to the same place and not separately coded.) This principle leads to the following decision rules for the cases described above:

**Pakistan.** Current and future data are recorded under Pakistan or Bangladesh, whichever country code is appropriate. Historical data are re-recorded as needed under the current country code within which the past event occurred (such as the location of a university). It is understood that pre-1972 data recorded under Bangladesh are to be aggregated with the data for Pakistan in order to accurately represent pre-1972 Pakistani data. Current Bangladeshi and Pakistani place codes are used in all situations, as the places themselves have not changed.

**Germany.** Current and future data, as well as pre-1949 historical data, are recorded under the country code for Germany and, where known, the appropriate German subdivision code. Historical data for 1949–1990 pertaining to West Germany (Federal Republic of Germany or FRG/BRD) and West Berlin are re-recorded under the current Germany country code and the appropriate current German subdivision code (West Germany recognized 11 of the federal states plus Berlin). The very small amount of historical data pertaining to the 1949–1990 former East Germany (German Democratic Republic or GDR/DDR) are re-recorded under the current Germany country code as needed and assigned to the subdivision code 99, "other" (East Germany was a unitary state and not subdivided). Current German place codes are used in all situations, as the places themselves have not changed.

**Yugoslavia.** Data reported for the territory of former Yugoslavia and referring to events in 1991 and thereafter are recorded under the appropriate current country code (Bosnia-Herzegovina, Croatia, Macedonia, Slovenia, or Yugoslav Federation [Serbia and Montenegro]). Historical data prior to 1991 are re-recorded as needed under the current country code appropriate to the location of the reported event. It is understood that pre-1991 data recorded for Bosnia-Herzegovina, Croatia, Macedonia, and Slovenia are to be aggregated with pre-1991 data for the Yugoslav Federation in order to accurately represent data for former Yugoslavia. As for Pakistan and Germany, current place codes are used in all situations.

**Soviet Union.** Data reported for the territory of the former Soviet Union and referring to events in 1991 and thereafter are recorded under the appropriate current country code (Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, or Uzbekistan). The small amount of pre-1991 data are re-recorded as needed under the current country code appropriate to the location of the reported event. It is understood that pre-1991 data recorded for all of the above-mentioned countries are to be aggregated in order to accurately represent data for the former Soviet Union. Current place codes are used in all situations.

## PART 3

### Country Subdivision Codes

This Part contains listings of country subdivision codes assigned to each country that is broken out internally in CDS. Countries not assigned subdivision subcodes are not listed here, and in the coding system are assigned the Geographic Subdivision Subcode 00, unknown responses. Subcode 99 is assigned to responses for each subdivided country that indicate subdivisions other than those listed below.

Refer to Chapters 3 and 4 for a detailed explanation of this subcode and to the special note on time-series problems in Part 2 of this Section.

#### AR ARGENTINA

NOTE: The subdivision codes assigned for Argentina include the provinces plus the federal district, which is the city of Buenos Aires. The province of Buenos Aires is a much larger territory of the same name that includes parts of the greater Buenos Aires metropolitan region, but not the city itself.

## **GB     UNITED KINGDOM**

NOTE: The United Kingdom is a monarchical and parliamentary union of several separate countries and entities possessing varying degrees of internal autonomy. Subdivision codes assigned for the United Kingdom include each of the non-English components of the union; the Channel Islands and the Isle of Man, which are united to the British monarchy but not part of the parliamentary union; and the Standard Regions into which the counties of England are grouped for economic planning and statistical reporting purposes. Each English region code is followed by the names of the counties grouped within it. In addition, the United Kingdom possesses several overseas colonies and administers several external territories which are assigned separate country codes. Refer to the country code list in Part 2 for a complete listing of all British dependencies.

## PART 5

### Standard Program Type Codes

The codes presented here are used for recording respondent data both on previous studies and on the field in which the U.S. doctorate is earned. Fields whose names are followed by an asterisk (\*) are ones for which respondents are permitted to write out a special name in a space provided on the survey instrument.

## PART 6

### Institutional Type Codes

Presented here are the institutional type codes used in the SED comparative data system to identify different institutions according to mission and degrees offered. *Broad type codes*, listed first below, describe the general character of an institution's mission and occur first in code string order (the left hand letter of the 2-character alphanumeric institutional type code). *Specific type codes*, listed last, describe the range of programs offered at a given institution and occur second in code string order (the right hand letter of the 2-character alphanumeric institutional type code).

Chapters 3 and 4 in Section One provide a detailed explanation of the institutional type code.

#### BROAD TYPE CODES

- A Comprehensive Research Institution.** *A postsecondary institution offering a wide variety of programs leading to the research doctorate degree, whether or not other types of programs are also offered.*
- B Specialized Research Institution.** *A postsecondary institution offering one or a few programs leading to the research doctorate degree, whether or not other types of programs are also offered.*
- D Comprehensive Mixed Institution.** *A postsecondary institution offering a wide variety of academic and professional programs at both the undergraduate (first award) and graduate levels, and possibly the subdegree level, but which does not award research doctorate degrees.*
- E Specialized Mixed Institution.** *A postsecondary institution offering one or a few academic and professional programs at both the undergraduate (first award) and graduate levels, and possibly the subdegree level, but which does not award research doctorate degrees.*
- F Comprehensive Undergraduate Institution.** *A postsecondary institution offering a wide variety of academic and professional programs at the undergraduate (first award) level and possibly the subdegree level, but which does not offer any graduate-level programs.*
- G Specialized Undergraduate Institution.** *A postsecondary institution offering one or a few programs at the undergraduate (first-award) level and possibly the subdegree level, but which does not offer any graduate-level programs.*

- H Comprehensive Subdegree Institution.** *A postsecondary institution offering a wide variety of academic and professional programs below the level of the first (undergraduate) award, but which offers no programs at first award level or higher.*
- I Specialized Subdegree Institution.** *A postsecondary institution offering one or a few academic and professional programs below the level of the first (undergraduate) award, but which offers no programs at first award level or higher.*
- J Special Institution.** *A postsecondary institution offering programs of various types that do not lead to regular degrees or other awards and which may or may not result in traditional academic credit.*
- Y Other Postsecondary Institution.** *Any identified postsecondary institution not classifiable under codes 1–8, including institutions offering programs not definable by level.*
- Z Unknown Postsecondary Institution.** *Any postsecondary institution about which too little is known to enable a precise type code assignment to be made.*

### SPECIFIC TYPE CODES

- A Comprehensive.** *The place code for a comprehensive institution as defined elsewhere in CDS.*
- B Liberal Arts.** *An institution offering programs in one or more of the humanities, social sciences, biological sciences, and physical sciences, but not in professional fields.*
- C Mixed Professional.** *An institution offering programs in one or more different professional fields, but not in academic subjects.*
- D Teacher Training.** *An institution offering programs primarily or exclusively designed to prepare teachers and related educational personnel, including the preparation of specialized teachers (e.g., vocational, physical education, and special education).*
- E Education.** *An institution offering programs preparing educators and educational researchers in a variety of specializations other than or in addition to teacher training, including administration, curriculum, psychology, counseling, and research and scholarship in education.*

- F**     **Law.** *An institution offering programs primarily or exclusively to prepare professional legal personnel, including lawyers, prosecutors and procurators, magistrates, judges, notaries, legal researchers and scholars, and legal support personnel such as paralegals.*
- G**     **Defense/Security.** *An institution offering programs primarily or exclusively to prepare service personnel for the armed forces, the police forces, or other related public security services.*
- H**     **Governmental.** *An institution offering programs primarily or exclusively to prepare civilian government professionals at the local, regional, national, or international levels in such fields as diplomacy and international affairs, public administration, public financial administration, and related administrative and technical support services. This category also includes the preparation of researchers and scholars in these specialized fields.*
- I**     **Social Service.** *An institution offering programs primarily or exclusively to prepare students for social services careers, including the fields of social work, child development, welfare services, family services and counseling, employment services and counseling, home economics, community organization and services, and related administrative and technical fields.*
- J**     **Religious.** *An institution offering programs primarily or exclusively to prepare students to enter religious vocations as clergy or in other occupations related to religious service.*
- K**     **Commercial and Business.** *An institution offering programs primarily or exclusively to prepare students for careers in various aspects of commerce and business administration in the private sector, including fields such as accounting, business information systems, marketing, enterprise operation, retailing, hospitality services, travel and tourism services, financial services, insurance, real estate, management services, personnel services and labor relations, office and clerical support, and related technical and research fields.*
- L**     **Communications.** *An institution offering programs primarily or exclusively to prepare students in the communications media and related skills, including print and broadcast journalism, technical aspects of printing and broadcasting, public relations, library science, archival administration, and translation and interpretation.*
- M**     **Alternative Health Professions.** *An institution offering programs primarily or exclusively to prepare practitioners or research personnel in one of the healing disciplines that may supplement or substitute for allopathic medicine, including*

*chiropractic, clinical and counseling psychology, homeopathy, hypnotherapy, naturopathy, optometry, osteopathy, podiatry, psychoanalysis, and culture-specific traditional medical arts.*

- N Technical.** *An institution offering programs primarily or exclusively to prepare technicians and technologists for industry, public infrastructure, and engineering support functions, including engineering-related technologies, industrial and production technologies, transportation technologies and operations, telecommunications technologies and operations, computer technology and operations, maintenance and repair technologies, building and construction technologies, and technical applications in the sciences and mathematics.*
- O Engineering.** *An institution offering programs primarily or exclusively to prepare students for professional careers in one or more branches of engineering, including the engineering sciences, computer and information sciences, and engineering specialties relating to management, production, and logistics.*
- P Architectural.** *An institution offering programs primarily or exclusively to prepare students for careers as architects and in related fields, including landscape architecture, urban design and planning, environmental design, historic preservation, and architectural research and scholarship.*
- Q Allied Health and Nursing.** *An institution offering programs primarily or exclusively to prepare nurses and other allied health professionals, including medical administrative support personnel, laboratory technicians and technologists, diagnostic and treatment services personnel, rehabilitation and therapy services providers, medical assisting specializations, mental health services personnel, medical social workers, and speech pathologists and audiologists.*
- R Medicine and Dentistry.** *An institution offering programs primarily or exclusively to prepare students for careers in allopathic medicine and dentistry as physicians, dentists, surgeons, specialists, or researchers.*
- S Mixed Health Professions.** *An institution offering programs in more than one of the health professions and related clinical sciences.*
- T Visual Arts.** *An institution offering programs primarily or exclusively to prepare students for mastery of one or more of the visual or visual arts disciplines, including fine arts, applied and commercial art, design and decorative art, crafts, photography, film and cinematographic art, and related technical, scholarly, curatorial, and administrative fields.*

- Y     Other Specialization.** *Any specialization not classifiable under codes A-X in this typology.*
- Z     Unknown Type.** *Any postsecondary institution about which too little is known to enable a precise type code assignment to be made.*

## PART 7

### Standard Program Completion Award Codes and Institutional Level Codes

Presented here are the standard program completion award codes used in CDS. The institutional level code is identical to the program completion award code because institutional level is defined as the highest degree or other program completion award (certificate, diploma) granted by an institution. Chapters 3 and 4 of Section One provide a detailed explanation of these codes.

#### SECONDARY LEVEL CODES

- 30**     **Short Secondary Awards**, *representing less than 12 years of formal schooling;*
- 31**     **Regular Secondary Awards**, *representing 12 years of formal schooling; and*
- 32**     **Advanced Secondary Awards**, *representing more than 12 years of formal schooling.*

#### POSTSECONDARY LEVEL CODES

- 50**     **Postsecondary Programs and Awards of No More Than 2 Years.** *Programs and awards that are designed to represent no more than 2 years of study; constitute postsecondary education as operationally defined in CDS; and are not second (graduate-level) programs and awards.*
- 51**     **Postsecondary Programs and Awards of More Than 2 But Less Than 4 Years.** *Programs and awards that are designed to represent more than 2 years of study but less than 4 years; constitute postsecondary education as operationally defined in CDS; and are not second (graduate-level) programs and awards.*
- 60**     **4-Year Postsecondary Programs and Awards.** *Postsecondary programs and awards that are designed to represent 4 years of study beyond 12-year secondary awards as operationally defined in CDS; and which are not second (graduate-level) programs and awards.*
- 61**     **Postsecondary Programs and Awards of More Than 4 But Less Than 6 Years.** *Postsecondary programs and awards which are designed to represent more than 4 but less than 6 years of study beyond 12-year secondary awards as*

*operationally defined in CDS; and which are not second (graduate-level) programs and awards.*

- 70     Advanced First Postsecondary Programs and Awards.** *Postsecondary programs and awards which are designed to represent 6 or more years of study beyond 12-year secondary awards as operationally defined in CDS; are not second (graduate-level) programs and awards; but may represent second first degree programs and awards.*
- 71     Postsecondary Second Degree Programs and Awards.** *Graduate-level programs and awards in academic or professional fields which constitute a second full degree after the first degree and are designed to represent 1 or more years of study and research.*
- 72     Advanced Graduate-Level Programs and Awards.** *Graduate-level academic or professional programs and awards which require prior possession of a first award and often a second award; which are designed to represent at least 1 year of study beyond the second degree and 2 beyond the first; and constitute a level of attainment beyond that of a second degree but not equivalent to a research doctorate.*
- 73     Research Doctorate Programs and Awards.** *Graduate-level programs and awards in academic or professional fields which require prior possession of at least a first degree and frequently a second; are designed to represent at least 3 and most often 4 or more years of study beyond a first award; involve the planning and execution of a major independent research project and the publication and defense of an original dissertation or thesis on the topic researched; are recognized as the terminal level of academic attainment in the regular progression of university-level studies; and bestow the title of "doctor" or the equivalent on the holder.*
- 74     Higher Doctorate Programs and Awards.** *Graduate-level programs and awards which require the prior possession of a research doctorate degree; represent a period of independent research and publication as a professional scholar or scientist outside the awarding institution and thus beyond the regular sequence of university-level study; constitute a portfolio of accomplishments (experimental research, publications, theoretical contributions, other professional work) to be judged by faculty peers; are not purely honorary awards; and confer a second doctorate or other title (such as "habilitated") and professional privileges.*

- 90**     **Programs and Awards Not Definable by Level.** *Structured or regulated programs of study in academic or professional fields at any postsecondary level that do not result in the award of a degree or other formal credential, and which may or may not result in some form of academic credit.*
- 99**     **Other Programs.** *Any known postsecondary program not elsewhere classifiable.*
- 00**     **Unknown Programs.** *Any postsecondary program about which too little information is known to enable a precise code assignment to be made, and nonresponses.*
